

I.A.A.F. APPROVED TWO CAMERA SYSTEM, PHOTO FINISH CAMERA, INTEGRATED VIDEO CAMERA, SCOREBOARD/CLOCK, ULTRASONIC WIND GAUGE

IAAF Photo Finish Guidelines – April 2010

"If the photo finish system is assisted by an integrated video camera showing the finish line from a head on position, the value of such camera in the identification of athletes can be vital. As the cursor on the image on the read computer is moved, the image from the video camera is advanced to the same elapsed time automatically."

[page 2, clause 3.1.7]

Integrated full-frame video for easier athlete identification. Completely Time-synched with FinishLynx

The CHAMPIONSHIP Package is an IAAF approved photo finish system that includes an Identilynx integrated full-frame video system as recommended by the IAAF. It will enable you to produce accurate results quickly, and with confidence in your ability to accurately identify all the athletes.

This all-inclusive system builds on the components of the COMPETITION ELITE Package. As well as including the Identilynx camera, this package also includes a scrolling Scoreboard/Display, an IAAF approved wind gauge, and an IAAF compliant Radiolynx wireless start detection system - all controlled from the FinishLynx software.

Components

- **Primary Camera** - Fully Upgradeable 2000 frames/second, timing enabled, Color **EtherLynx 2000+**
 - F-mount through-the-lens alignment viewer with remote iris control
 - Nikon Compatible 24-70mm f2.8 zoom lens
- **Identilynx Full-Frame Video Camera** - Fully integrated video images synchronized with photo finish camera, complete with lens, power supply, cabling and tripod.
- Complete mounting system for primary camera.
- All-inclusive Camera and Start Cable sets
- Built-in interface to scoreboards and wind gauge
- Automatic race-image capture software plugin that also operates as a photocell to control the running time clock at the finish line.
- 9-digit alphanumeric scoreboard/running time clock and tripod.
- **FinishLynx 32** - Multi Language* Photo Finish Software.
- **LynxPad** - Multi Language* Event Management Software
- Remote Control Camera Positioning platform
- IAAF Compliant Wireless Start Detection System
- Ultrasonic (IAAF compliant) Wind Gauge

* See Website for current listing. FinishLynx available in English, Spanish, French, Arabic, German, Italian, Korean, Portuguese (Brazil), Russian, Swedish, Finnish, Chinese (Simp.), Chinese (Trad.), Japanese

CHAMPIONSHIP PACKAGE FEATURES

A significant benefit of a CHAMPIONSHIP system is the addition of an Identilynx full-

frame video camera to aid in athlete identification. The images from the EtherLynx 2000 camera and the Identilynx camera are synchronized and can be displayed side by side on the operator's computer screen for totally reliable results.

Also, the included scoreboard display can be used as a time clock or as a display for results. As an added feature, the Championship Elite Package comes complete with the patented Lynx automatic capture and virtual photo cell

CHAMPIONSHIP PACKAGE FEATURES

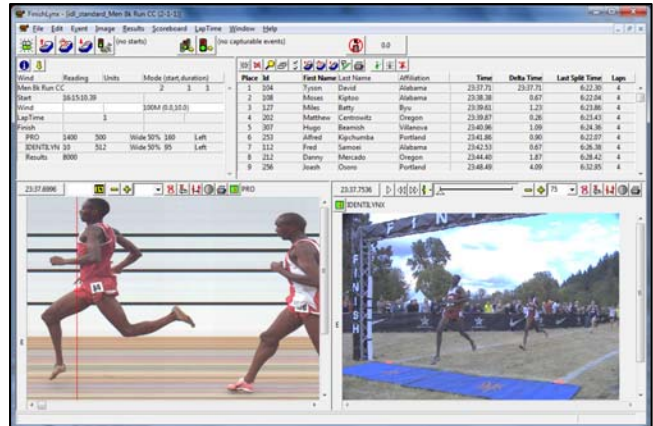

software. This software will provide two unique functions: First, the software can control the camera to automatically take images of athletes crossing the finish line, without the need for photo cells. Second, when this software is combined with the scoreboard included with the CHAMPIONSHIP solution, an athlete crossing the finish line will freeze the running time clock with an instantaneous finishing time or split time display.

Finally, the ultrasonic wind gauge included with the CHAMPIONSHIP package has no moving parts and meets the latest standards of the I.A.A.F.. [Rule 163: 8,9,10,11]

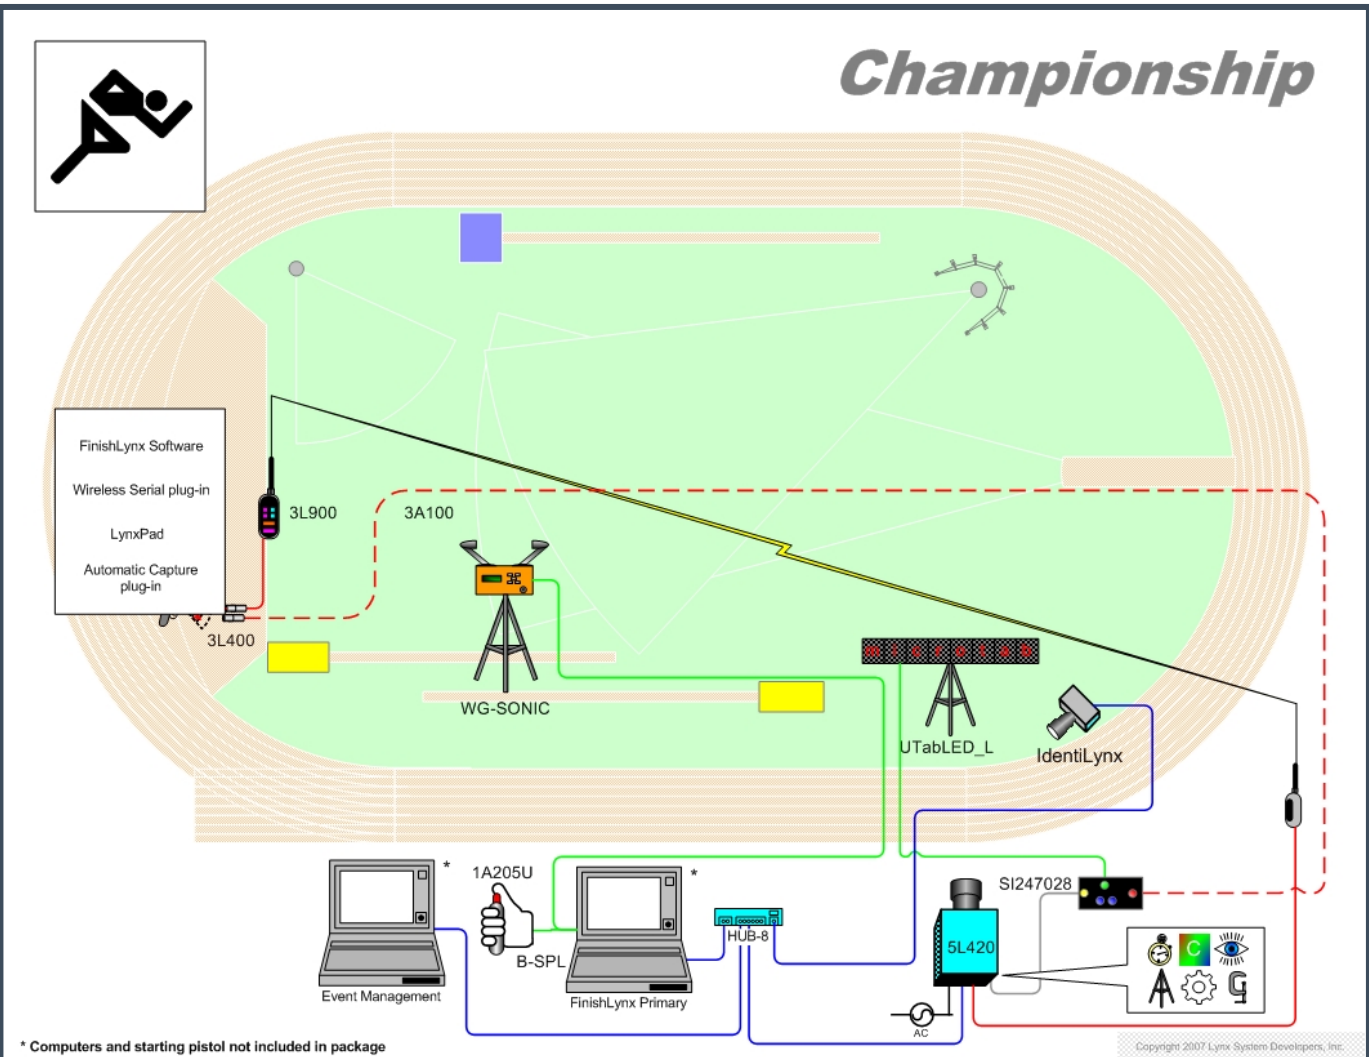

Inclusion of readings into the race results is fully automated and controlled directly from the FinishLynx software, without the need for any intervention

by the user. [Rule 163: 12]

The CHAMPIONSHIP Package offers an all-inclusive two camera solution that combines many unique Lynx features that will make system operation quicker and easier, with state-of-the-art hardware that is IAAF approved, reliable, and upgradeable.

Fully integrated photo finish and "zoomable" video can also be used for Cross Country

* Computers and starting pistol not included in package
