<p>WHY CHOOSE LYNX?</p> <p>When you choose a Lynx packaged solution, you can be safe in the knowledge that you have made an intelligent investment. You will have everything you need to produce and distribute accurate results.</p> <p>Because of the Lynx tradition of providing their customers with access to the latest software upgrades, you can be confident that as time goes by you will continue to feel good about your decision. Lynx will always provide you with the very latest advances in digital timing.</p> <p>In addition, because of the modular design of Lynx technology, you can add enhancements to your timing system at any future time as your needs grow.</p>	
<p>COMPETITION PACKAGE</p> <p>This I.A.A.F approved Photo Finish and Timing system from Lynx is a perfect introduction to the universally accepted and field-proven, Lynx Technology.</p> <p>At the heart of the system is the EtherLynx 2000 digital photo finish camera, which uses the same data transmission protocol as the internet itself. With this solid and proven technology powering the communication between the photo finish camera and the FinishLynx computer, and more than a decade of use in the field, Lynx technology is rock-solid.</p> <p>Add to the equation the quality of Lynx service and technical support around the globe, and it is easy to understand why so many venues are now featuring Lynx technology.</p> <p>LYNX SYSTEM DEVELOPERS, INC. 179 Ward Hill Ave Haverhill Ma 01835</p>	

The COMPETITION ELITE Package includes all the components of the COMPETITION Package – Plus! (See: ●)

The COMPETITION ELITE Package is an all-inclusive, single-camera, color photo finish system. It needs only a computer to deliver I.A.A.F. compliant, Fully Automatic Times (FAT) at an athletics competition.

In addition, this package includes two key innovations to make setup fast and error-free. It is supplied with a through-the-lens viewer, complete with an F-mount (NIKON compatible) 28-105mm zoom lens, and an IAAF compliant wireless start detection system.

I.A.A.F. Rule 165:15 (2010-2011 Edition)

...[Fully Automatic Timing apparatus] shall be started automatically by the Starter's gun, so that the overall delay between the report from the muzzle or its equivalent visual indication and the start of the timing system is constant and less than 1/1000th of a second.

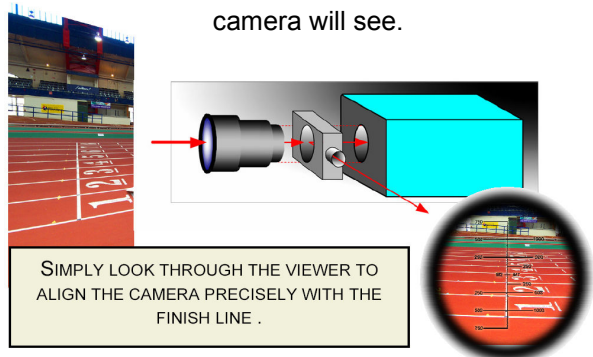

COMPONENTS

- **Camera - EtherLynx 2000+**, fully upgradeable 2000 frames/second, Timing Enabled, Color
- F-mount(Nikon compatible) through-the-lens alignment viewer and remote iris control
- Nikon-compatible 24-70mm f2.8 zoom lens
- Complete Professional Tripod and mounting hardware with precision adjustment
- All-inclusive Camera and Start Cable set
- Built-in interface to scoreboards and wind gauge
- **FinishLynx 32 - Multi Language*** photo finish software.
- **LynxPad - Multi Language*** Event Management Software
- IAAF Compliant RadioLynx Wireless Start Detection System

* See Website for current listing. FinishLynx available in English, Spanish, French, Arabic, German, Italian, Korean, Portuguese (Brazil), Russian, Swedish, Finnish, Chinese (Simp.), Chinese (Trad.), Japanese

COMPETITION ELITE PACKAGE

Building on the standard COMPETITION Package, the COMPETITION ELITE package offers two major features that will make system setup faster and easier: a wireless start detection system, and a specially designed Lynx through-the-lens viewer. With the unique Lynx viewer, you can actually look through the eyepiece and see exactly what the camera will see.

SIMPLY LOOK THROUGH THE VIEWER TO ALIGN THE CAMERA PRECISELY WITH THE FINISH LINE .

COMPETITION ELITE FEATURES

Then, using the precision graticule, you can determine the extent of the field of view covered by every setting of pixel density. The viewer comes fitted with a 28-105mm f2.8-3.8 Zoom lens and will accept any of a wide range of Nikon or Nikon-compatible fixed focal length and zoom lenses.

The RadioLynx wireless start system will eliminate the need to run cables to all the start locations around the track: 100m, 200m, 1500m, and 400m.

The secure wireless transmission technology is powerful, portable and

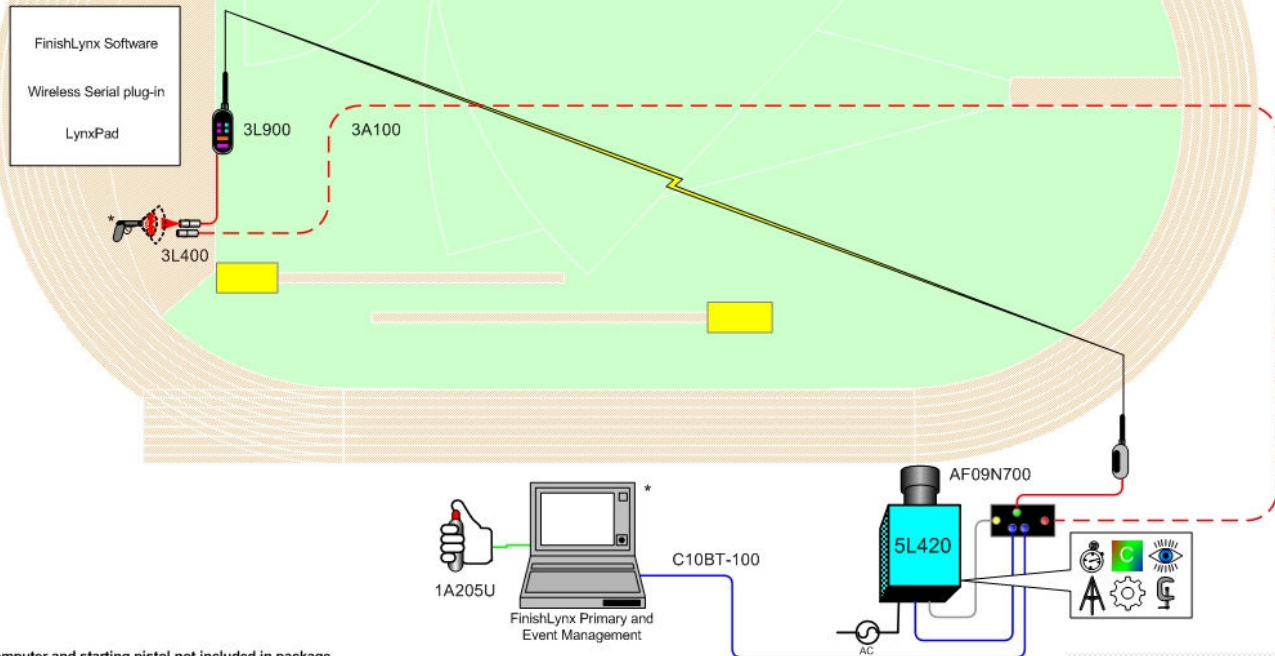

**IAAF COMPLIANT
WIRELESS STARTS**

reliable. Even a missed or interrupted transmission is no problem – a press on the repeat button will re-send the race start time to FinishLynx. With a response time of less than 0.001 seconds, RadioLynx is compliant with I.A.A.F Rule 165:15.

ABOVE: THE RADIOLYNX
WIRELESS TRANSMITTER AND
START SENSOR.

Competition Elite

* Computer and starting pistol not included in package
