

BRONZE PACKAGE

Lynx photo finish and timing technology is used around the world for all types of competitive rowing and paddling events, from traditional sprints and head races, to Canoe/Kayaking, and Dragon Boat events. Moreover, our photo finish systems have been proven at the highest levels of competition, including the Head of the Charles Regatta, US Olympic Rowing Trials, the FISA World Rowing Masters Regatta, and ICF Canoe Sprint World Championships.

Lynx has designed packaged solutions to specifically address the numerous issues associated with water courses including covering wide finish lines and handling solar glare. Anchoring this entry-level package is the **EtherLynx 2000+** photo finish camera. This timer-enabled device not only includes an 80-200 mm Nikon zoom lens, but also a high-resolution upgrade for increased frame-rate (2000 lines/second) and increased vertical resolution (1000 pixels).

But while the linescan camera plays a key role in producing high-quality photo finish images, it is the **FinishLynx32** software that transforms raw data into results. This Windows program integrates timing, lane assignments, and photo finish results into a clean, intuitive user interface. When joined with the precision components also included, this powerful hardware/software combination makes the Rowing & Paddling Bronze Package the most capable and cost-effective entry-level solution to date.

COMPONENTS

- **Camera - EtherLynx 2000+**, 2000 frames/second includes high-resolution and timer-enabled options
 - F-mount(Nikon compatible) through-the-lens alignment viewer and remote/auto iris control
 - Nikon Manual-zoom 80-200mm f/2.8 zoom lens
- Super Head Clamp, Geared Mounting Head, and Tripod for precision adjustment
- All-inclusive Camera & Start Cable set with Capture Button, and USB-to-Serial Converter
- Custom carrying case
- **LynxPad** – Meet management software
- **FinishLynx 32** – Multi-language* photo finish software.

* See Website for current listing. FinishLynx available in English, Spanish, French, Arabic, German, Italian, Korean, Portuguese (Brazil), Russian, Swedish, Finnish, Chinese (Simp.), Chinese (Trad.), Japanese

BRONZE PACKAGE FEATURES

- Digital images shot at up to 2000 frames per second provide accurate, indisputable photo finish results no matter how close the finish.
- Mounting hardware, Through-the-lens viewer, and Nikon zoom lens ensure an easy camera setup, alignment, and adjustment on any course variation.
- The “building block” nature of Lynx packages means that your existing components can be upgraded at any time, and you are never limited by your initial purchase.
- Quick-start guides and technical support hotline make the transition to photofinish timing easy and painless. If any problems do arise, Lynx technicians are on hand for maintenance and support.

BRONZE PACKAGE BENEFITS

Because so many races throughout the years have come down to the final few strokes, digital photo finish technology is a logical addition the sport of rowing. While there are fundamental differences among rowing and paddling, water events share a universal set of challenges. For instance, solar glare can be a big issue when capturing races on water, which is why the high-resolution EtherLynx 2000+ camera has a light sensor that deals especially well with reflections and changes in light, and an auto-iris control that constantly monitors ambient light conditions and adjusts the lens aperture automatically. The Bronze solution includes a specially designed Lynx through-the-lens viewer and integrated Nikon compatible lens mount. With the unique Lynx viewer, you can actually look through the eyepiece and see exactly what the camera will see.

THE LYNX BRONZE PACKAGE

Although perfectly suited for permanent installation, Lynx also understands that many teams need to travel to reach the water, which is why the package is designed to be completely portable and easy to set up. The through-the-lens viewer and high quality Nikon 80-200 mm zoom lens make camera alignment and adjustment fast and easy. Finally, the Lynx carrying case stores your camera and accessories, simply add the included tripod and a laptop computer and you have everything you need.

The FinishLynx32 software (right) integrates all your real-time images and data into one, easy-to-use computer interface. The software can be used in races of any length or size, and includes features like on-screen lane assignments to help with identification and results.

The software is not only configurable for shell, team, and leader times, but can also interface with countless other components like scoreboards, split timing technologies, and additional cameras for endless upgrade opportunities. Most importantly, our "building block" system ensures that nothing you buy goes to waste. Should you ever decide to upgrade your system, existing components can be exchanged or upgraded with new features like color options, cameras, or wireless accessories.
