

## GOLD PACKAGE

The Gold Package is considered the most impressive packaged rowing and paddling solution available today. Not only does this system include the high-resolution **EtherLynx PRO** camera, but the included split timing and network tools give increased data collection and distribution options. This powerful packaged solution includes the EtherLynx PRO wireless camera connectivity option, RadioLynx wireless start system, a sophisticated Chronometer with remote, button-activated, split generation devices for every lane and every split point, ResultTV software, and FinishLynx plug-ins - all seamlessly integrated for instantaneous and error-free information flow.

The REI2 Chronometer and LinkPod units contribute to sprints and head races because they provide a convenient solution for measuring individual split-times, even at a significant distance. The included ResultTV software allows you to send your real-time data to any network displays - from the administration tent, to the announcer's booth, to broadcasters. The Gold Package integrates all these components to create a photo finish solution fit for even the most sophisticated rowing and paddling events.

## GOLD PACKAGE FEATURES

- Chronometer and LinkPod units allow operators to capture and record real-time splits throughout the entire course
- 5LWiFi upgrade for the EtherLynx PRO allows the camera to communicate wirelessly for hassle-free setup and capture
- The open-interface design of Lynx hardware and software means that you can easily communicate with third-party components like starting lights and scoreboards.

## COMPONENTS
