

World Athletics-Approved Three-Camera Timing System

Two Vision Cameras for Reverse-Angle Results

"There should be at least two photo finish cameras in action, one from each side..." – World Athletics Rule 165:19.20 (2020-21)

The **Championship Elite Package** delivers **three time-synchronized viewpoints** from the finish line: two line-scan cameras on opposing sides and full-frame Identilynx video capturing from the front. The 2,000 fps Vision camera serves as the primary photo-finish device, while the second 2,000 fps Vision captures reverse-angle images from the opposite perspective.

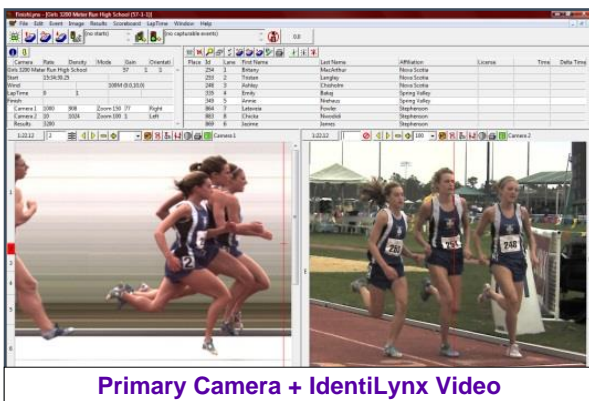

By combining two EtherLynx Vision cameras with an Identilynx front-facing video camera – and integrating them with the other Championship Elite components – we've created one of the most powerful timing solutions available today.

Components

- **Primary Camera: EtherLynx Vision**, 2,000 fps x 1280 pixels, color images, On-Board Level, timer-enabled, EasyAlign
 - **LuxBoost Low-Light Amplification Option**
 - **Internal Battery Pack Option**
 - **Electronic Filter Option**
 - Internal RadioLynx Option
 - Video Display Module for HDMI Display Output
 - C-Mount f1.2, 8-48mm Motorized Zoom Lens (**x2**)
- **Secondary Camera: EtherLynx Vision**, 2,000 fps x 1280 pixels, color images, On-Board Level, EasyAlign, High-Resolution
- Identilynx Full-Frame Video Camera (30 fps, 720p)
- Ultrasonic Wind Gauge (World Athletics compliant)
- Lynx Portable LED Display
- Remote Lens & Remote Camera Positioner (**x2**)
- RadioLynx Wireless Start System
- All-inclusive Power, Ethernet, & Start Cable Set
- Tripod & Mounting Hardware for Precise Adjustment
- **Professional Tripod with 3m+ elevated mounting**
- Built-in Interface to Scoreboards and Wind Gauges
- Full-Access to Lynx Technical Support
- 1-Year Renewable Warranty
- **FinishLynx32 Multi-Language*** Photo-Finish Software
 - Automatic Capture Mode (ACM) Plug-in
 - RadioLynx Wireless Start Plug-in
- **LynxPad Multi-Language Meet Management Software**

* Available in English, Spanish, French, Arabic, German, Italian, Korean, Portuguese (Brazil), Russian, Swedish, Finnish, Chinese (Simp.), Chinese (Trad.), Japanese. See Website for current listing.

FinishLynx Championship Elite Package for Athletics

Primary Camera + Identilynx Video

The **Championship Elite Package** is an all-inclusive athletics timing system with two photo-finish cameras and an Identilynx head-on video camera so you can capture three different views of the finish line. The system meets all World Athletics timing guidelines and enables you to produce accurate, full-color, reverse-angle results.

The reverse-angle camera and Identilynx video are especially useful in races where the view of an athlete's torso may be obstructed by another competitor - making it difficult to establish a finish order. In this case, you can see **three different time-synchronized views** of the finish line to evaluate a very close finish with accuracy to up to 1/2000th of a second.

FinishLynx Championship Elite Package for Athletics

The Championship Elite Package includes all the components from the Championship package (like IdentiLynx, ACM, and an LED display), as well as a 3+ meter camera tripod and key networking components so you can integrate serial devices across your timing network.

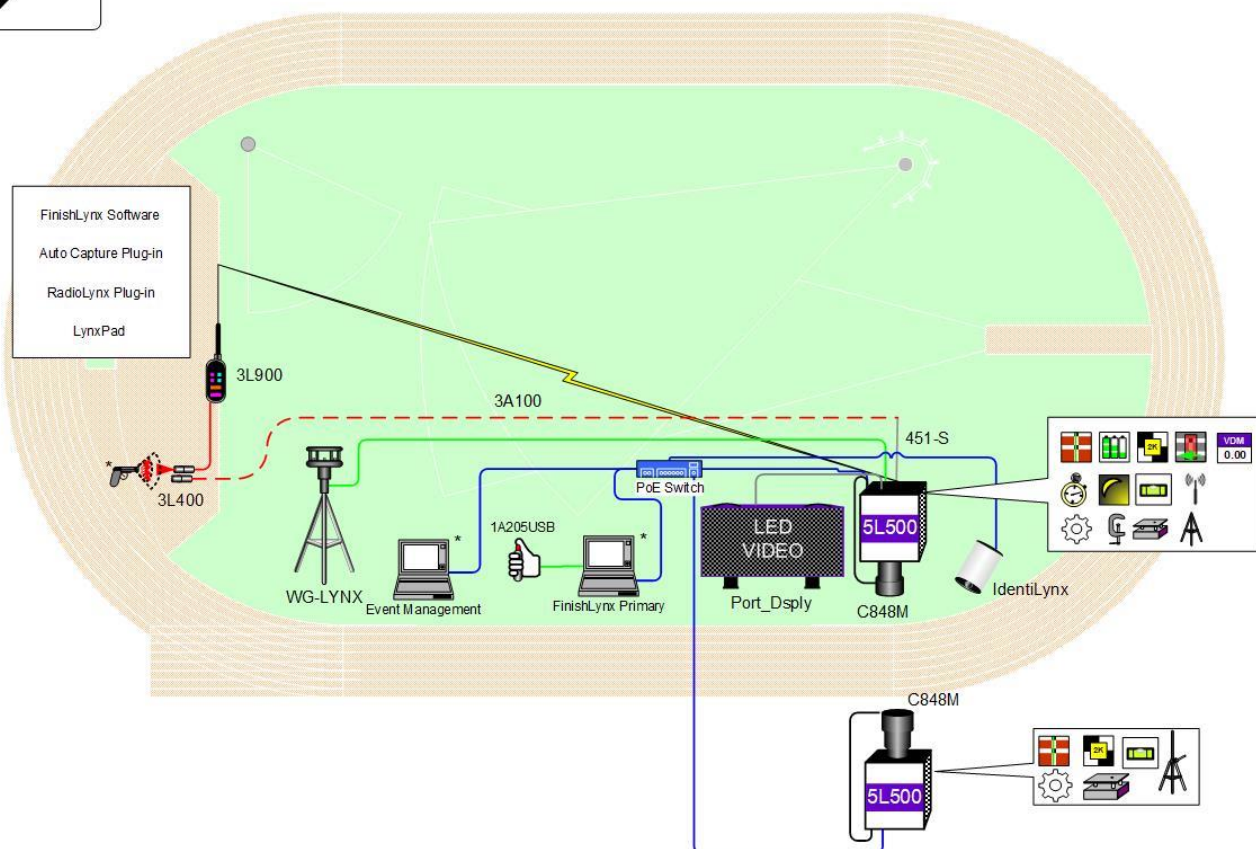

The package also includes two EtherLynx Vision cameras for full-color, reverse-angle results. Both Vision cameras include Automatic Capture Mode and come outfitted with remote control features for easy setup and adjustment at your venue's finish line. The primary Vision camera also includes several premium upgrades that will enhance the ease and quality of your race captures.

 <p>LuxBoost - LuxBoost greatly amplifies the brightness during low-light captures. Evening events that were once too dark to capture can be recorded with ease.</p>	 <p>On-Board Level - The on-board level allows you to monitor that the camera is level directly from within the FinishLynx software.</p>
 <p>Internal Battery Backup - The primary Vision comes with an internal battery pack that allows the camera to continue running in the event of a power outage.</p>	 <p>Electronic Filter Control - This upgrade allows you to enable or disable low-light camera filters on your Vision camera right from within the FinishLynx software.</p>
 <p>Internal RadioLynx – Built-in RadioLynx receiver for a clean and simple set up.</p>	

Athletics – Championship Elite

* Computers and starting pistol not included in package
