## NOTES FROM THE EDITOR

### Kate Farrington

Lynx System Developers, Inc. brought excitement to the floor of the USAT&F convention in Dallas with the announcement of the release of our latest contribution to the arena of Total Event Management: **FieldLynx**.

FieldLynx is a powerful software program that runs on a palm-sized computer. It collects and stores data from field events, like high jump and javelin, and disseminates results to data management programs, scoreboards, and the public. Read more about it by [clicking here](#).

Keep your eyes peeled for some more hot new products on the way...

### IN THE SPOTLIGHT

#### 1997 World Canoe Championships

This fall we added another World Championship to our resume by providing full results to the 1997 World Canoe Championships.

A timing team armed with Ether-Lynx 2000 and CyberScoreboard headed up north to Dartmouth, Nova Scotia (Canada), and dazzled officials and spectators alike with a flawless presentation.

Scott Logan, the Executive Director of Sport Nova Scotia and the Chair of the Competition Committee summed it up perfectly: *"Without question, the World Canoe Championships recently held in Dartmouth, Nova Scotia, were the most efficiently organized and technically supported in terms of results management. I state this as a former national and Olympic coach, having attended just about every major canoeing event in the world since 1985."*

*"The efficiency of your system and its integration into the broader results management system cannot be overstated. Once running, it almost seemed too easy from the perspective of the observer. There were no discrepancies, delays or errors. Results were to the public within seconds of each race's conclusion and on the internet within a minute. Truly incredible given the traditions of world bodies and their trust in technology."*

Our Cyberscoreboard logged hits from nations around the globe as canoe fans tracked the progress of the event from their home countries. We are delighted that all the different aspects of the FinishLynx event management were such a big hit with officials, competitors and fans.

## CONVENTION ANTICS Show and Tell around the country

This time of year is marked by the occurrence of many different types of conventions. At the Dallas USAT&F convention among the hoards of coaches and VIP's who descended upon the booth to catch a demonstration of FieldLynx was Doug Padilla, the injured top US distance runner.

Padilla was able to give encouraging news about the progress of his recovery when he stopped by and chatted with Doug DeAngelis, the Lynx President.

**Doug (DeAngelis) and Doug (Padilla)** At the December High School AD's convention in Nashville, the highlight was a visit to the booth by the amazing FloJo (Florence Griffith Joyner).

FloJo was there with her husband, Al Joyner, and he and Lynx Sales Supremo, Kevin McGill, were soon chatting about the "good old days". While they were talking, FloJo was persuaded to run past the Lynx camera a few times so that we could add her (very stylish) image to our Wall of Frames.

## TALKING TO TELEVISION

### From Concession Stands to the Jumbotron

More and more FinishLynx customers are displaying their output on television. This is true at **all** levels of **all** sports.

At the simplest level are the smaller customers who are simply converting the output from their FinishLynx monitor screens and displaying this output on televisions located around their sport facility.

At the opposite end of the spectrum are the major sporting event producers like the Hong Kong Jockey Club, or the World Cup of Cycling, who are displaying photofinish images on huge scoreboard displays costing hundreds of thousands of dollars.

Whatever the budget, the thinking is the same: An informed spectator is a happier spectator.

We have heard of High Schools showing FinishLynx at the concession stands so that spectators don't mind leaving the stands to buy food and drinks. The result? Increased takings at the concession stands. . . and crowds of people gathering to watch the FinishLynx technology in action.

As well as the on-site use of television, there is also broadcast television, and - again - FinishLynx is perfectly suited to work in this area. Our product LynxTV has provided on-screen running times to television broadcasts around the globe in both PAL and NTSC formats.

Recently, Bob Shallow of Trans World International had this to say about the relationship between FinishLynx and TV Broadcasting: *"You and your staff at Lynx System Developers have had the vision to track TV's course and successfully navigate our impending merger with such items as fully customizable on-screen characters, high quality video photofinish imagery as well as character generator interfacing.*

*Unlike other technology offerings, FinishLynx systems and personnel not only integrate simply and seamlessly into a TV production, but - most importantly - they work as they should."*

Talk to us and see what we can do for your event.

---

## WORLD TOUR CONTINUES

### **Lynx in Europe, in Africa, in the Americas, and around the Pacific Rim**

FinishLynx users have been busy around the globe recently. Here are just a few of the events where Finish-Lynx has been a central part of the event management process since our last newsletter:

- European Short Track Speedskating Championships, Budapest, Hungary.
- 10th Pan Arab Athletic Championships
- Venezuela Junior Athletic Championships
- Olympic Qualifier in Short Track Speedskating, Den Haag, Holland
- World Junior Speedskating in St. Louis, Missouri

---

## MURRAY KEATINGE INVITATIONAL

### **Cross Country at its best**

Lynx System Developers Inc. was delighted to be able to contribute to the success of 1997's Murray Keatinge Invitational Cross Country meet.

Lynx President, Doug DeAngelis a one time Captain of the University of Maine Cross Country team, agreed to help defray the costs involved in bringing some of the nation's finest cross country teams to Orono, Maine. We hope to continue our involvement with this prestigious meet in years to come.

---

## HERE NOW and COMING SOON

## Auto Iris for Nikon lenses and other things to watch out for.

The next issue of Finish Lines will be brimming with cool new products. Available now is the remote control iris for F-mount (Nikon) lenses. Full details next issue, or see the special page on our website: [http://www.finishlynx.com/auto\\_iris.html](http://www.finishlynx.com/auto_iris.html).

There will also be a special area in the next issue devoted to Horse Racing and Greyhound Racing. If you are in these industries and have any stories, tips, or unusual pictures, we would appreciate hearing from you so that we can include your material.

**As always, Snail Mail, e-mail, telephone, or fax us with your comments, tips, or stories.**

**REMEMBER:** Our Area code has changed from 617 to 781. Our main number is now **(781) 935-6959**. Our Fax is now **(781) 938-0580**

## AUTOMATE YOUR FIELD EVENTS WITH FIELDLYNX

**The unparalleled data handling speed and accuracy of a FinishLynx system for your field events.**

FieldLynx is our latest product. When used with Hy-Tek's MEET MANAGER, it will revolutionize the management of field events in the same way that FinishLynx improved the administration of Track events.

Using FieldLynx couldn't be easier. A single cable connects the unit to the computer running Hy-Tek.

Flights lists are downloaded. The unit is taken to the event and the event is scored. Finally, the results are uploaded back to the meet management computer.

**POWERFUL, PORTABLE, SELF-CONTAINED**

**Comes complete with a docking cradle**

Despite its small size, the FieldLynx unit is powerful and is compatible with Windows 95 and Windows NT.

## **FieldLynx and Docking Cradle**

FieldLynx will enable you to share information with your meet management computer, scoreboards, announcers, and television production facilities.

---

### A COMPLETE RESULTS SYSTEM... . . . *in the Palm of Your Hand*

With this hand held computer you can easily connect to a computer running your favorite meet management software.

Despite its small size, Fieldlynx is so powerful it can do many things:

- List the competitors in an event
- Keep track of the order of competition
- Enter results
- Instant display of current standings
- Upload the results back to your main computer
- Display information on a scoreboard
- . . .all without anyone retyping any information.

---

### RESULTS FOR ALL

#### **No more isolation for athletes in field events.**

When results are entered on an official's clipboard only those who can see that clipboard know who is winning, or what an individual's performances are.

Because of the complexity of the scoring system used in some field events, up until now it has been almost impossible to know the standings of some field events as they progress. With FieldLynx this has all changed. A simple tap on the screen and the powerful internal computer automatically calculates standings.

Couple this with FieldLynx's power to drive scoreboards and infield displays, and it is easy to see why the administration of field events will never be the same again.

## SIMPLE OPERATION

Small, weatherproof, and fast.

**Add Athlete**

**ID:** .....

**Last Name:** .....

**First Name:** .....

**Affiliation:** .....

This athlete will be added to the end of the competition list.

Data entry is simple and intuitive. As always, the Lynx development team is comprised of people who understand the sport, and thanks to their knowledge a new user will feel confident in just minutes.

## SPECIAL PRICES

**Call and check prices**

Find out how FieldLynx and Hy-Tek's MEET MANAGER can make the administration of field events easier and error free

---

FinishLynx Hall of Frames . . . *if you can meet with triumph and disaster and treat these two imposters just the same. . .*

At the recent Olympic Qualifying Meet in Den Haag, Holland, skaters needed to finish in the top twenty to be assured of a berth at the Nagano Winter Olympics. The German skater, Arian Nachbar, missed a top twenty place as a result of finishing third in his heat by a margin of 0.003 /second (picture shown above).

The happy ending for Nachbar is that he was selected when another qualified skater declined the invitation to attend.

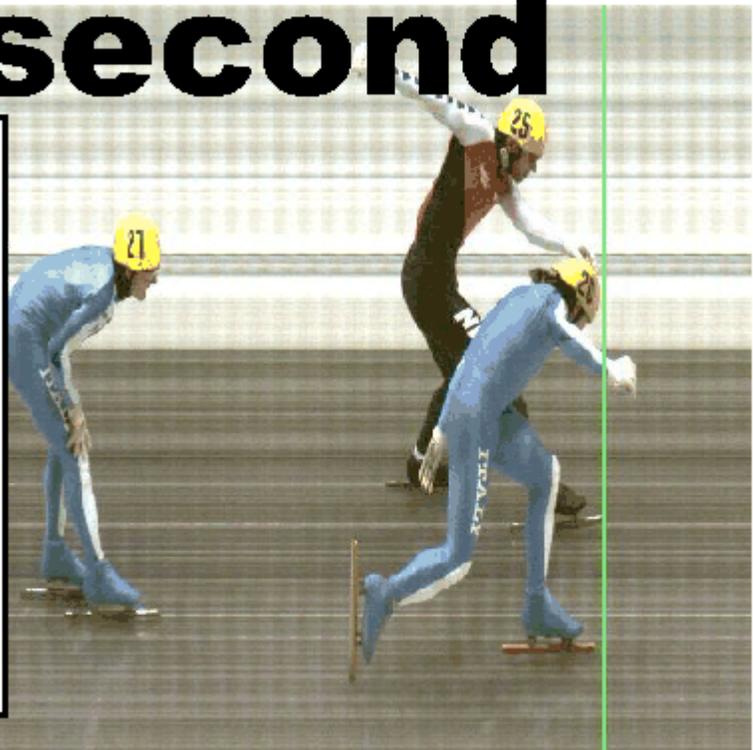

### Heats 500 m MEN

Place	Id Lane	Name	Affiliation	Time
1	63 1	Jun-Hwan Lee	ROK	43.674
2	2 4	Richard Ciernitz	ATN	43.810
3	29 2	Arian Nachbar	GER	43.843
4	91 3	Apolo Ohno	USA	44.366

# +0.003 second

A thrilling men's 500 meter final at the European Championships in Budapest, Hungary, culminated in a last-gasp move by Dave Versteeg of the Netherlands that took him past Fabio Carta and into the record books with a new **World Record**. 42.648 seconds

Hungarian Television (MTV!) showed the race **10 times** and featured the FinishLynx image of the finish in their coverage.
