LYNX SYSTEM DEVELOPERS, INC.

Gold Package

The Gold Package is the most comprehensive rowing and paddling timing solution available today. Not only does this system include the high-resolution **EtherLynx Vision PRO** camera, but the advanced split timing and network components provide more options for professional data capture, display, and distribution.

This package comes with the RadioLynx wireless start system, EtherLynx Vision cameras for each split location, plus a Remote Positioner for each Vision camera. It also includes ResuITV live results display software and several FinishLynx plug-ins, all of which are seamlessly integrated for fast and error-free results.

The EtherLynx Vision split cameras contribute to sprints and head races because they provide a convenient solution for measuring individual split-times, even at long distances.

The ResulTV software allows you to send your real-time data to any network displays, and from the administration tent to the announcer or broadcaster booths. The Gold Package integrates all these components to create a photo-finish solution fit for even the most advanced rowing and paddling events. Discover why federations around the world trust FinishLynx.

Gold Package Features

- EtherLynx Vision cameras equipped with Remote Positioners allow operators to capture and integrate real-time splits throughout the entire course.
- ResulTV display software allows you to send live results and race data to compatible video boards.
- The open-interface design allows seamless integration with third-party components like starting lights & displays.

- * See Website for current listing. FinishLynx available in English, Spanish, French, Arabic, German, Italian, Korean, Portuguese (Brazil), Russian, Swedish, Finnish, Chinese (Simp.), Chinese (Trad.), and Japanese

The Rowing Gold Package

The EtherLynx Vision cameras can be placed at intermediate locations throughout the course for precise, real-time splits. In addition, each camera comes equipped with a Remote Positioner making the placement and alignment of each camera easier than ever. The data is compatible with all types of scoreboard displays.

These advanced timing and network components provide an unprecedented amount of control and mobility. Operators will enjoy the Vision PRO color camera and RadioLynx wireless start. The package also includes the Multi-Split software plug-in to manage the split cameras. All the components are compatible with the FinishLynx timing software for seamless integration across the photo-finish results
