

## Field Event Packages Grand Prix & Grand Prix Elite

The Grand Prix and Grand Prix Elite Field Packages bring the highest levels of technology to the world of field event management. These two Grand Prix-level packages include all the major components from the Championship Elite Package, while adding several custom LED video displays and the ResultTV software for world class results and fan engagement throughout the infield.

### Custom LED Video Boards & Displays

The Grand Prix Package includes four 4-digit wind gauge/countdown displays plus four **Lynx 360 Displays** for high-quality graphics at every field event station. The four displays show real-time field event marks from FieldLynx as they are entered by meet officials. Four LED panels connect to form a 4-meter circumference and displays high-visibility scrolling or static text, images, results, and animated graphics for superior fan engagement everywhere around the venue — all powered by a convertible tablet/laptop computer running FieldLynx and ResultTV.

### ResultTV Live Results Display Software

Field event marks are entered into FieldLynx on a computer and then the ResultTV software outputs vector graphics directly to the video board. Athlete names, performances, rankings, and other event info can be sent directly from the computer using ResultTV to display dynamic, high-visibility graphics. Choose from a number of default templates or customize your graphics for the event by adding custom colors, images, logos, or GIFs.

## Grand Prix Elite Benefits

The Grand Prix Elite is the most advanced field event administration package on the market today. It includes all the technology from the Grand Prix Package (2x LaserLynx, 2x wind gauges, 2x SerialLynx wireless units, 6x tablets, 6x FieldLynx licenses, ResultTV, etc.) plus it adds two additional countdown timers (six total) and swaps out the 360 displays in favor of four premium 3-sided LED video boards.

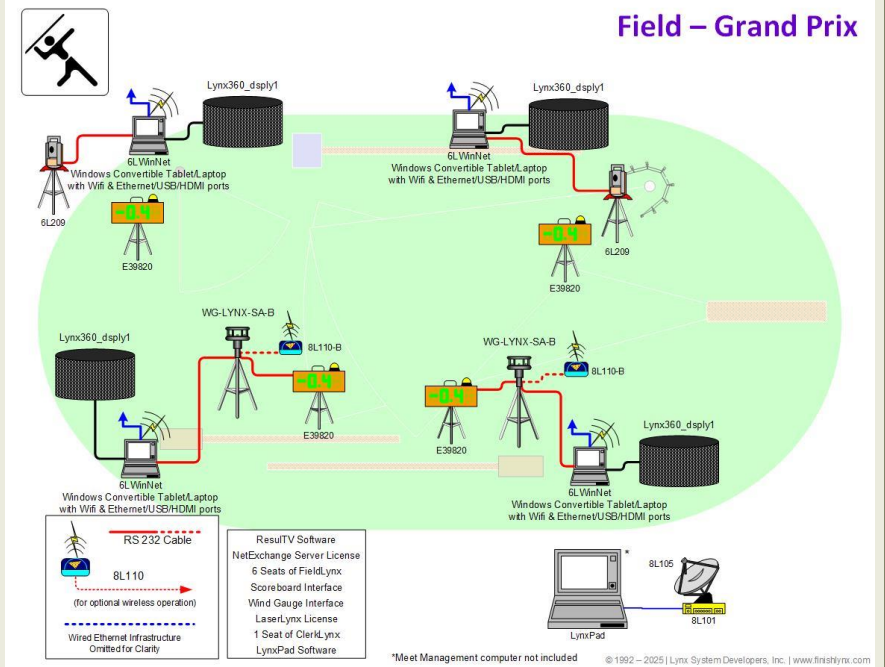

The 3-sided video displays provided with the package are suited for the highest levels of competition and have been used at World Athletics meets around the world. They combine three 2x1 meter LED panels using a custom-designed aluminum frame. The graphics are mirrored on all three panels to provide 360 degree visibility from throughout the stadium.

Each board includes a weatherproof vinyl cover to protect the rear connections and a sturdy wheel assembly base for easy transportation and movement throughout the venue.

## Components: Field Grand Prix Package

- **6x Windows Convertible Tablet/Laptop** with Wi-Fi & Ethernet/USB/HDMI ports
- **6x Seats of FieldLynx Field Event Software**
  - **Scoreboard Interface** FieldLynx Plug-in
  - **Wind Gauge Interface** FieldLynx Plug-in
  - **LaserLynx Interface** FieldLynx Plug-in
- **1 Seat of ClerkLynx Remote Clerking Tool**
- **NetExchange Field Event Server License**
- **4x ResultTV Display Software License**
- **2x Ultrasonic Wind Gauge Kit & Battery Pack**
- **AirLynx Wireless 802.11 Gateway and Amplified Antenna Kit**
- **2x Wireless SerialLynx units**
- **2x LaserLynx PRO Electronic Distance Measurement Systems**
- **4x (4-Digit) 6" LED Wind Gauge Displays & Countdown Timers**
- **4x Lynx 360 Video Displays**
