

VeriLynx Gold Package

Increase Meet Quality & Mobility

The **Gold Package** contains all of the components from the Silver Package, along with several key features that allow operators to build a more advanced results network perfect for national or international events.

In addition to the VeriLynx V60 camera, the Gold Package includes a second VeriLynx V30 camera. This camera can be placed as a reverse-angle to capture each competitor from the front.

Both cameras include an auto-iris motorized lens so the zoom and focus can be adjusted remotely within the FinishLynx software. They also have a sturdy housing that protects the lens and rear connections from moisture and damage. VeriLynx will save all images to disk in real-time (no image loss) and allow you to quickly review every attempt for every athlete, providing proof in case of a foul.
