Obtaining Lynx Products and Information

There are three ways to obtain Lynx products and information:

- » Go to the Lynx website (<http://www.finishlynx.com/product/>)
- » Call (978) 556-9780 and ask to speak with someone in sales, or
- » Send an email to...
 - Domestic Sales: domsales@finishlynx.com
 - International Sales: intlsales@finishlynx.com

Obtaining Technical Support

There are three ways to obtain technical support for Lynx products:

- » Go to the Lynx website (<http://www.finishlynx.com/support/>)
- » Find our latest video tutorials on YouTube (<https://www.youtube.com/c/FinishLynx/videos>)
- » Call (978) 556-9780 and ask to speak with someone in tech support, or
- » Send an email to...
 - Technical support: support@finishlynx.com

What's New

TIP: To preserve your current settings, do not uninstall the old version.

Internal GPS Improvement

Vision-Series cameras now support an updated module for [Internal GPS](#). This GNSS-compatible module can use additional satellites from other networks beyond the GPS system and provide a faster and more reliable link to keep the camera synchronized with GPS time.

LapTime Improvements

- » The status bar will display NOT SYNCED for MYLAPS LapTime devices if the Sync Source is set to Internal and IntSyncMask=2, until a gunshot marker is received.

VeriLynx Improvements

- » Auto-export no longer creates an image when an athlete passes an attempt (Attempt|Insert).

Scoreboard Scripts

- » **RCP_VeriLynx.Iss** is updated.
- » **VDMPlaceLaneNameTime.Iss** is added.

Remote Control Updates

The StartCreate command can now create a manual start when Hardware Type is set to None.

NOTE: For a full list of commands, see the [FinishLynx Remote Control Specification](#).

Lynx Data Protocol Updates

A new Image Parameters feature allows "reset image" to specify a time in the image.

NOTE: Run FinishLynx as Administrator (right-click shortcut + Run As Administrator) for best performance.

TIP: For more information, check out our video tutorials on [YouTube](#).
