

Portable-VDM

Datasheet

Integrated ResultTV-VDM Solution

Portable-VDM is an integrated display solution that combines ResultTV-VDM* running on a battery-powered Windows Mini-PC in a weatherproof connection box. It can be connected to your Ethernet or WiFi network to receive data from FinishLynx, FieldLynx, or LynxPad, and display graphics on your Lynx Video Display via the HDMI output.

Convenient solution to connect a Lynx Video Display (Portable, Infield, 360) for those who don't have a Vision camera and cannot use the VDM upgrade, or for those who want more flexibility to decide on the location of their LED video displays for track or for field events.

Data Source – FinishLynx, FieldLynx, LynxPad, ReactTime.

Connection – Wired Ethernet or Wi-Fi to ResultTV-VDM PC. HDMI between ResultTV-VDM PC and display sending card.

Resolution – Limited to the size of the display purchased with the solution.

Layout – Similar to VDM. Design is controlled by selected scoreboard script. Default scripts are included with FinishLynx, FieldLynx and LynxPad.

Portable-VDM Components

Windows Mini-PC

- WiFi and Wired Ethernet - Connect automatically to an AirLynx Wireless network or configure it for your own wireless network.
- HDMI output – connects directly to your display
- Pre-configured settings and pre-installed software
- Remote Desktop connection for advanced configuration

Weatherproof Connection Box

Battery-Powered

- Rechargeable 12V/6000mAh Lithium-Ion battery (10 hours of run time)
- Includes AC/DC charger
- LED charge level indicator

Software

- [ResultTV-VDM](#) software
- ScorePlus App

PLUS Option – Includes an AirLynx Lite mini-router to create a small private wireless network with a range of at least 200 feet.

***ResultTV-VDM** is a simplified version of ResultTV. Like the VDM option for Vision-series cameras, the content of the ResultTV-VDM layout is controlled by the data received. The source applications (FinishLynx, FieldLynx, FieldLynx Lite or LynxPad) come standard with pre-defined and customizable scoreboard scripts to create modern and eye-catching layouts for all types of events.
