18 June 2018

Dear Doug,

Technological devices other than the reaction time measuring module of the Start Information System (SIS) (e.g. Timing Systems, Wind Gauges, Distance Measuring Equipment etc.) used in athletics are not issued a certificate by the IAAF and therefore no certified lists for such devices are available.

All measuring equipment used in IAAF competitions shall be manufactured and calibrated according to international standards. The accuracy has to be guaranteed by the manufacturer according to the relevant international standards and shall have been verified by an appropriate organisation accredited by the national measurement authority.

To our knowledge and experience, the equipment of Lynx meets this condition and is also successfully used in international athletics competitions organised under IAAF Rules and Regulations.

The "ReacTime Championship" accelerometer based reaction time measuring module of the SIS by Lynx System Developers, Inc (software ver. 2.0 or later) was studied and tested according to the established IAAF criteria and was found to have met the current requirements for an IAAF Product Certificate.

Sincerely,

A handwritten signature in black ink, appearing to read "Imre Mátraházi".

Imre MÁTRAHÁZI
